About Me

- Good programmer who writes clean code for humans, optimizes for machines, and uses AI for both — ship fast and never fight your tools.
- Tech lead who focuses on the final product and gets the team there. Keep reinventing the wheel, but rounder every time.
- Floating in the cloud, living in containers, automating everything, pair-programming with AI to bend reality a bit.
- Currently focused on orchestrating agents, delivering innovations, and scaling the revolution.

Technical Skills

Languages	JS/TS, Python, Go, Swift, SQL, Shell Script
AI / LLM	LLM APIs, Claude Agent SDK, LangChain, RAG, Local LLM Inference (vLLM, llama.cpp), Qdrant
Frontend	React, TanStack, shadcn/ui, Tailwind CSS, single-spa, ag-grid, Zedux, Playwright
Backend	Node.js, Bun, Express.js, GraphQL, Flask, hey-api
Infrastructure	Docker, Kubernetes, AWS, Google Cloud, Proxmox, GitHub Actions
Databases	PostgreSQL, MySQL, MongoDB, Turso/libSQL

Work Experience

Vice President, Lead Software Engineer — JPMorgan Chase, Jersey City, NJ

Nov 2024 – Present

Leading architecture and development of Portfolio Intelligence 2.0 — a next-generation corporate portfolio asset management platform featuring a multi-window frontend and real-time SSE streaming for a modern, high-performance experience.

- Leading a frontend team as Tech Lead and architect for the PI 2.0 platform rebuild.
- Designed and implemented a multi-window frontend architecture with real-time SSE integration, using single-spa for micro-frontend composition and ag-grid for high-performance data rendering.
- Built with JPMorgan's internal Salt DS design system and Zedux for state management, with Playwright covering end-to-end testing.
- Driving AI adoption initiatives across the engineering team, including building an agentic Jira-to-code workflow to accelerate the full development lifecycle.

Tech Stack: TypeScript, React, TanStack, Tailwind CSS, single-spa, ag-grid, Salt DS, Zedux, Playwright

---

Master Builder — Loopdoop LLC (Personal Projects)

Jan 2024 – Present

- Built **Juicer** & **Keeper** — a full AI content pipeline that ingests, processes, and backs up X/Twitter content using multi-model AI processors (taxonomy, signals, summarization, fact-checking) with async workers and S3-compatible storage.
- Designed and deployed a personal AI inference lab from scratch — RTX 4090 GPU passthrough on Proxmox, running and benchmarking open-source LLMs (Qwen3-32B, vLLM, llama.cpp) for real-world local inference at scale.
- Built **ModelPK.com** & **DevsBestFriend.com**, and published open-source libraries and MCP servers (**prompts-mcp-server**, **xtract-js**, **WebRobber**).

Senior Engineer & Tech Liaison — Haven Tech, New York, NY

Apr 2018 – Dec 2023

Built and scaled the HT Underwriting platform — an ML-powered insurance decisioning system that reduced risk evaluation time from weeks to under a minute.

- Built the end-to-end underwriting workflow supporting multi-stage decisioning for term and whole life insurance, including the HUP Admin platform for managing the full flow.
- Integrated with multiple third-party data providers including MIB, Milliman IntelliScript, LexisNexis, ExamOne, and APS.
- Built Metron, a company-wide configuration management system with full history tracking.

Tech Stack: Node.js/TS, Python, Angular/React, RabbitMQ, Postgres, Ocra, AWS

Senior Developer & Tech Lead — Yieldmo, New York, NY

Dec 2014 – Mar 2018

Worked on a privacy-compliant, ML-driven ad platform connecting advertisers and publishers with smarter contextual targeting and higher conversion rates.

- Built and maintained core ad products including responsive ad formats, Ads SDK, and the Ad-Builder website.
- Built internal tools including the Admin System, A/B Testing Tool (YMTP), and Product Feed System.
- Held a US patent for methods of serving interactive and video advertisements to users.

Tech Stack: Java, Spring MVC, TypeScript, Angular, Express.js

---

Consultant — Kforce Inc

Jan 2010 – Dec 2014

Consulted across multiple industries, delivering web platforms and internal tools for clients including Verizon, Audible, Pearson, and Barclays Capital.

Education

M.S. in Computer Science — Syracuse University, Dec 2009

Patents

- **Methods for serving interactive content to a user**
  Patent No. US9966109B2 | Filed: Mar 27, 2018
- **Methods for serving a video advertisement to a user**
  Patent No. US10306336B2 | Filed: Jul 19, 2018
